What is predatory publishing?

- Publishers and journals categorized as "predatory" are uninterested in sharing properly cited and reviewed work or respecting the rights of authors; they are interested solely in profit and often ask authors to pay huge publishing or presenting fees. Some predatory journals claim to be legitimately Open Access, which results in scholars sometimes conflating OA with predatory practices.
- Predatory journals are the product of predatory publishers, institutions that are unethical in their publishing practices by not following proper academic and ethical standards for the publication of scholarly work. This includes lack of proper peer review, proper citation, and the charging of exorbitant fees for publications that will never be reviewed or published in the way that the publisher proposes.

What are predatory journals?

Sources:

<https://www.openaccessjournal.com/blog/predatory-journals-list/>

How can I determine if a journal is considered predatory?

There are a number of ways to evaluate a journal as predatory or legitimate. Be wary of publishers without verifiable contact information; short time from submission to publication, usually within days; fake editorial boards; call for submissions that arrive in a spam-like email; journals with no prominent displays of author fees; and missing or dubious statement of a peer-review process.

<https://thinkchecksubmit.org/journals/>

Checklist for Identifying predatory publishers

	What to check
Contact information	<ul style="list-style-type: none">• Does the journal's website provide complete contact information?• Does it include a verifiable address?
Scope of the journal	<ul style="list-style-type: none">• Is the journal's scope multidisciplinary?• Does it combine multiple, unrelated, wide-ranging fields?
Editorial board	<ul style="list-style-type: none">• Does it include recognized, affiliated experts? (TIP: contact a few & inquire about their experience with the journal)
Author fee	<ul style="list-style-type: none">• Does the journal charge authors a publication fee? (TIP: find out about such charges before submission)

Checklist for Identifying predatory publishers: Cont.

What to look for	What to check
Quality of articles	<ul style="list-style-type: none">• Does the journal publish good quality research (TIP: check with your Department Head or supervisor to gauge quality)
Peer review process	<ul style="list-style-type: none">• Is the peer review process described on the journal's website? (TIP: most credible journals are likely to display it)
Indexing information	<ul style="list-style-type: none">• Is the journal indexed or a member of a prominent publisher association?• Does it display in an ICV/ Index Copernicus Value?
Retraction Policy	<ul style="list-style-type: none">• Does the journal have a clear policy for recalling articles? (TIP: check journal policies or its instruction to authors)
Pitch for authors	<ul style="list-style-type: none">• Does the journal guarantee publication or quick peer review? (TIP: if it sounds too good to be true, it probably isn't)
Email invitation	<ul style="list-style-type: none">• Does the journal, its editors and staff all have institutional or journal-affiliated email addresses?

Andi Asrifan:

Just a gentle reminder of our request for your review of the submission, "Reading Circles: Triggers for Increased Engagement of EFL Learners in Extensive Reading," for TESL-EJ Submissions. We were hoping to have this review by 2022-11-20, and would be pleased to receive it as soon as you are able to prepare it.

If you do not have your username and password for the journal's web site, you can use this link to reset your password (which will then be emailed to you along with your username). <https://teslej-sub.org/ejojs2/index.php/ejojs2/login/resetPassword/aasrifan?confirm=de567f81631bbf2508b0413260ccfd84519ce?e3f23ea1e24e3b2d3738f307e5%3A1669604852>

Submission URL: <https://teslej-sub.org/ejojs2/index.php/ejojs2/reviewer/submission?submissionId=1620>

Please confirm your ability to complete this vital contribution to the work of the journal. I look forward to hearing from you.

About TESL-EJ

<http://tesl-ej.org/wordpress/about/>

Introduction

TESL-EJ began as the brainchild of a group of scholars who saw the need for a freely-distributed electronic academic journal. It has been an “open access journal” since the beginning — even before the phrase “open access journal” had been invented. It has grown to become an internationally-recognized source of ESL and EFL information for people in scores of countries.

All content is freely available without charge to the readers or institutions. Users are allowed to download and share the content published by TESL-EJ as long as they credit the authors and the journal appropriately and do not change the content in any way or use them commercially, [“CC BY-NC-ND” \(Attribution-NonCommercial-NoDerivs\)](#). This is in accordance with the Creative Commons definition of “open access.” Authors retain copyright to their own articles and have full publishing rights if they wish to post or print it elsewhere. Please attribute TESL-EJ as the original source.

Fake/Cloned/Predatory Journals

CLONED JOURNAL

This phenomenon is also commonly known as “hijacked journals” or “clone journals.” Clone journal web pages are a **counterfeit mirror of an authentic journal that exploit the title and ISSN of legitimate journals.**

Fake/ Predatory journals—also called fraudulent, deceptive, or pseudo-journals—are **publications that claim to be legitimate scholarly journals, but misrepresent their publishing practices.**

Comments About Paper

Aspects of the paper	Questions	YES or No
Abstract	<ul style="list-style-type: none"> Is the nature and scope of the paper clearly stated in the abstract? 	Yes
Introduction	<ul style="list-style-type: none"> Does introduction provide relevant background information? 	Yes
	<ul style="list-style-type: none"> Does Introduction indicate the scope and direction of the paper? 	Yes
	<ul style="list-style-type: none"> Does Introduction provide a context for the main issue? 	Yes
	<ul style="list-style-type: none"> Does Introduction indicate the focus of the paper? 	Yes
	<ul style="list-style-type: none"> Are the objectives mentioned clearly along with significance of the study for the relevant audiences? 	Yes
Review of literature and Theoretical framework	<ul style="list-style-type: none"> Review of the existing literature covers all relevant aspects of the study? 	Yes
	<ul style="list-style-type: none"> Is the context of the topic or problem established clearly in the literature review or historical background? 	Yes
Research design and methods	<ul style="list-style-type: none"> Is the methodology clear and supported by literature? 	Yes
	<ul style="list-style-type: none"> Is the method used appropriate to the objective of the study? 	Yes
	<ul style="list-style-type: none"> Is the methodology reliable for the interpretation of findings? 	Yes
	<ul style="list-style-type: none"> Is clearly mentioned why is chosen this methodology? 	Yes
Data collection	<ul style="list-style-type: none"> Are the data collected with the proper instrument? 	Yes

Discussion, Findings And Interpretation	<ul style="list-style-type: none"> Are findings interpreted in the light of the literature, and terms are clear for the general audience and reader? 	Yes
	<ul style="list-style-type: none"> The language of the paper simple, cohesive and free form jargons? 	Yes
References	<ul style="list-style-type: none"> Is the literature based on various studies? 	Yes
	<ul style="list-style-type: none"> Is the literature integrated within the body of the paper? 	Yes
Paper Guidellnes	<ul style="list-style-type: none"> Is the paper written according to the journal guideline? 	Yes
	<ul style="list-style-type: none"> Are all headings and subheading numbered? 	No
	<ul style="list-style-type: none"> Are tables and figures properly made? 	Yes

Other Comments:

The topic of the paper is in line with the journal focus. The title of the paper correctly states the subject of the paper.

The sequence of statements in introduction lead coherently to the purpose of the study. Methods used are valid and all information is available to further studies.

There are no discrepancies in the results and findings are interpreted in the light of the literature. The study reveals what the researcher intend and the discussion do not merely repeat the results.

Please take into consideration that headings and subheadings should be numbered

Based on the above comments I strongly recommend this article for publication in

Linguistic Research

RECOMMENDATION

Publish as it is.	<input checked="" type="checkbox"/>
Publish with the minor revision noted above.	<input type="checkbox"/>
Publish with major revision noted above	<input type="checkbox"/>
Reject (*)	<input type="checkbox"/>

(*) The reasons for the paper rejection must be clearly stated.

What should you do? (If your paper was not rejected)

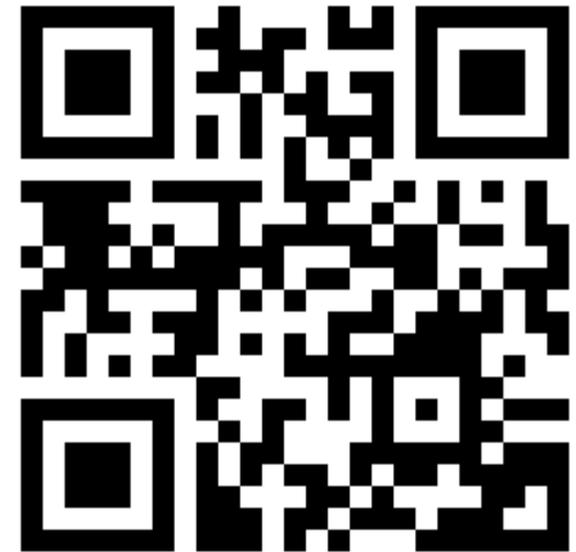

- ✓ Revise the paper according to the reviewer's comments (if applicable)
- ✓ All authors must agree on the publication; such an agreement should be communicated via e-mail.

Useful Tool for Identifying Predatory Journals

<https://beallslist.net>

PREDATORY JOURNALS

<https://www.aku.edu/library/Pages/predatory-journals.aspx>

Predatory publishing: A to Z elements

There is no single checklist for determining if a publisher or journal is predatory. However, reputable publishers and journals share some common qualities and features.

A ffiliation Reputable journals are established by academic and research institutions or organisations.	B e vigilant Use a tool such as Think, Check, Submit , to determine if a journal or publisher is legitimate or predatory.	C opyright User and author rights and copyright information are clearly stated on the website of reputable publishers or journals.	D irectory The Directory of Open Access Journals is a good reference list for legitimate open access journals.	E ditors/ editorial boards Editors or Editorial Boards of reputable journals consist of recognised experts in the publication's subject field.	F ees Information on publication fees for reputable journals is easy to find and understand.	G enuine An approach from a reputable publisher will correctly identify your research area.
H ijacked journals Hijacked journals are predatory journals which are created to look like reputable journals. Access a list of hijacked journals.	I SSN Every journal has its own unique and regular ISSN. Hijacked journals typically use the ISSN of a legitimate journal.	J ournal ranking and impact factor Predatory journals may advertise a fake or inflated impact factor. Journal impact factors can be checked in the Journal Citation Reports (JCR) Database .	K nown Reputable journals are well-known. Ask your peers if they have heard of the journal you are submitting to.	L andscape Check if the academic publishing landscape is clearly defined (e.g. the publishing and access options and the editing and publishing services).	M istakes Beware of red flags such as incorrect or clumsy use of scientific terms and language, formatting errors and more.	N on professional Predatory publishers will often contact you using non-professional email addresses (i.e. not linked to an institution or publication).
O pen access Open access publishers should have a clear Open Access policy and be a member of the Open Access Scholarly Publishers Association (OASPA) .	P eer review Predatory journals typically have poor or non-existent peer review processes.	Q uality Predatory journals tend to publish most, or all, the submissions they receive, regardless of quality.	R equirements Reputable journals provide clear requirements regarding the submission of papers.	S cope The scope of reputable journals is well defined and clearly stated on the journal's website.	T rack record Reputable publishers and journals have a good track record on quality publishing and have been working to a regular publishing schedule.	U nwanted solicitation Predatory journals often send call-for-paper emails or other forms of solicitation to researchers individually.
V erifiability Contact information of reputable publishers and authors are clearly provided on their website.	W orkflows Publishing options and workflows or stages, including the peer review process, are clearly indicated for legitimate journals.	X Retraction policy Reputable journals have clear retraction policies while predatory journals do not.	Y ou Legitimate publishers and journal editors want to help you! They are approachable and will answer publishing-related enquiries and clarifications.	Z ero tolerance for plagiarism Reputable publishers promote zero tolerance for plagiarism and have put steps in place to prevent plagiarism during the publishing process.		

What is a predatory journal?

A predatory journal is an opportunistic publishing venue that exploits the academic need to publish but offers little reward for those using their services.

The "publish or perish" scenario combined with the relative ease of launching online journals has inadvertently created a market ripe for the exploitation of researchers.

Some journals are predatory on purpose, while others may make mistakes due to neglect, mismanagement, or inexperience.

While the motivations and methods vary, predatory journals have a number of common characteristics:

- Their primary goal is to make money (i.e. there will be APC fees).
- They do not care about the quality of the work published (i.e. no or little editing or peer-review).
- They make false claims or promises (i.e. claims of impact factors and indexing).
- They engage in unethical business practices
- They fail to follow accepted standards or best practices of scholarly publishing

Predatory Publishing – How the scam works

Predatory journals exploit a new publishing model by claiming to be a legitimate open-access operation.

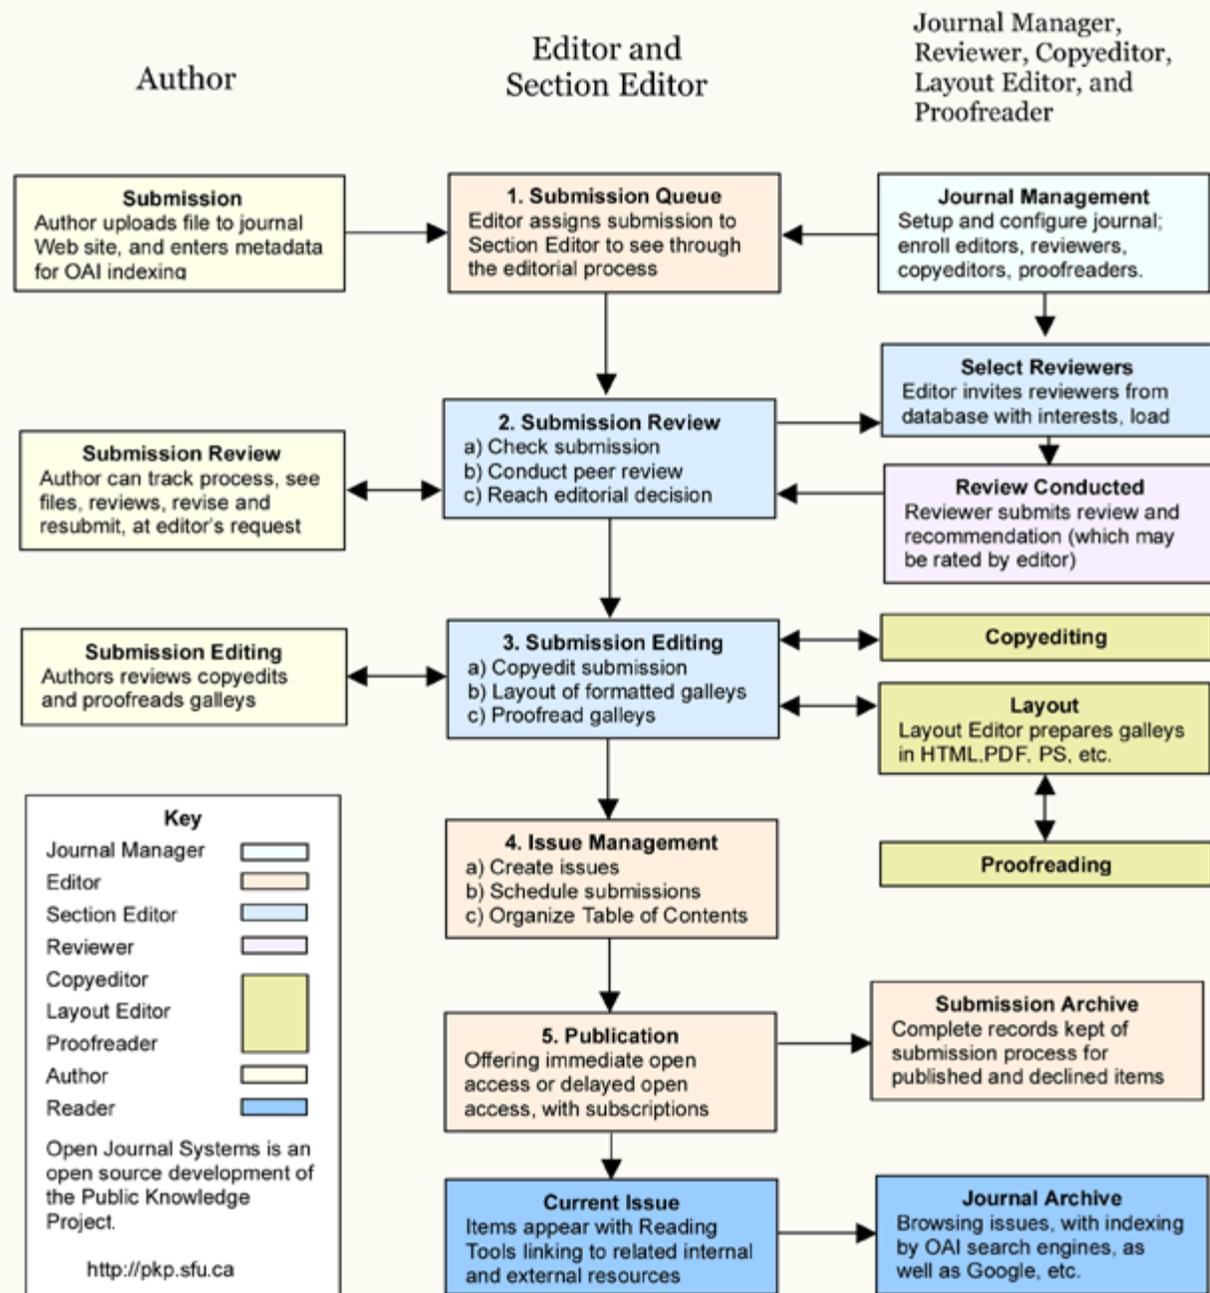

Online predatory publishers take advantage of the **Gold Open Access** model. Under this model Article Processing Charges (APCs) provide publishers with income instead of subscription fees.

It's important to realize that being Open Access does not make a journal predatory, their behavior does.

Predatory journals make false claims (such as quick peer-review) to lure unwary authors into submitting papers.

While sending a predatory journal a manuscript may see it "published" there is no guarantee that it underwent peer review, is included in indexes like Web of Science (WoS) and Scopus, or that it will be available in a month much less in five years.

Abstract: Three Important Roles

Abstract

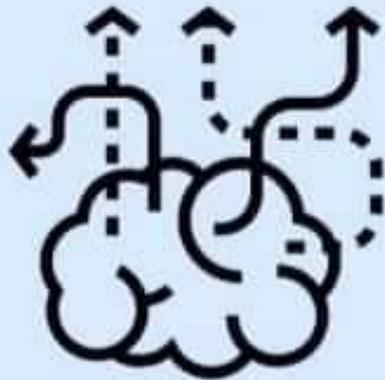

Introduction

Methods

Results

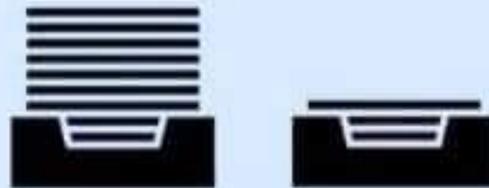

Discussion

When Writing
Improving your
Research Question

*Write the abstract first to
troubleshoot the research
question before moving on.*

Once Submitted
Convincing Editors It's
Worthy of Peer-Review

*Half of manuscripts at high-
impact journals are rejected
based on the abstract.*

After Publication
Getting the Rest
of the Article Read

*Readers will start here to
decide if the rest of the
article is worth reading.*

Introduction: Three Paragraphs

Abstract

Introduction

Methods

Results

Discussion

Give Context

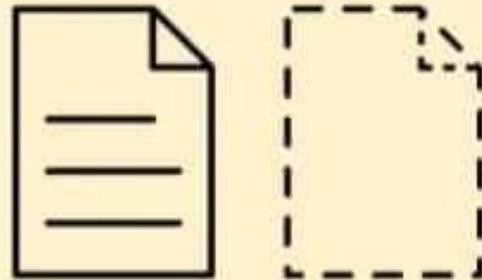

Get the reader to care about the topic.

Bring the reader up to speed on the why the topic is important.

Create a Knowledge Gap

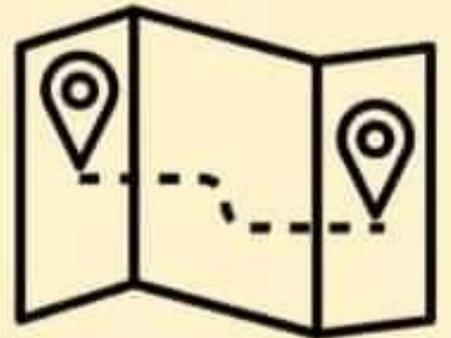

Get the reader curious about what is missing.

Make clear what is known and what is unknown to date.

Preview Your Plan

Connect the knowledge gaps to your study plan.

State how your study will fill the knowledge gap.

Methods: Know Thy Mentor

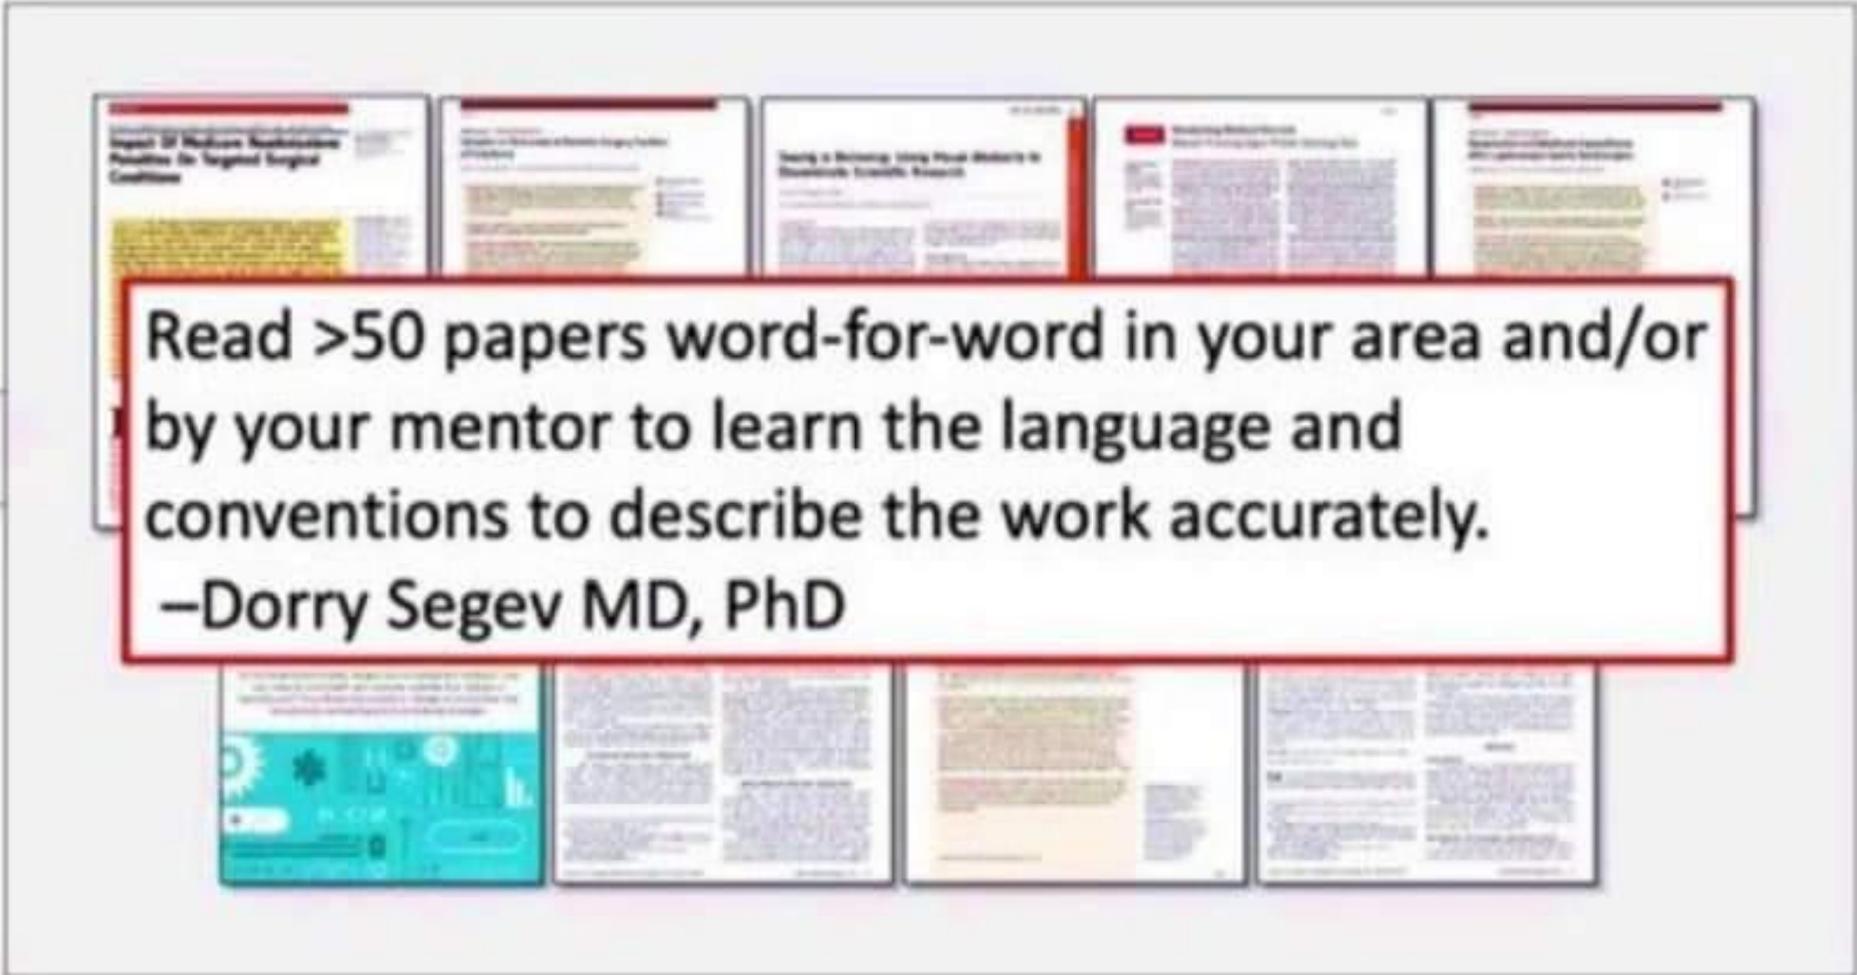

Abstract

Introduction

Methods

Results

Discussion

Read >50 papers word-for-word in your area and/or by your mentor to learn the language and conventions to describe the work accurately.
